MA4M4TRIX THERMOLATOR HAWK WOODCROFT

technology

-  **floodgate:** interior zipper panel, designed to maximize warmth by preventing water flow.
-  **no zip:** more flexibility, increased warmth, and superior performance.
-  **short zip:** 25% shorter than the standard. nothing wrong with a little more flexibility.
-  **anatomic:** a pre-bent wetsuit design that fits the natural curves of the body, minimizing excess neoprene, while maximizing fit and function.
-  **superflex:** body glove's exclusive stretch kneepad, bringing you the best combination of performance and durability.
-  **d-span:** elastic printing on the wrist and ankle cuffs, controls the stretch of the openings, reducing water entry.

-  **shock cord:** revolutionary lace-up system with cinch tab, keeps the bootie snug and tight.

materials

-  **vapor flex:** body glove's revolutionary water repellent stretch neoprene, repels water while still providing maximum stretch, performance, and durability. hollow fiber brushed tricots material in the chest and back traps warm air and pulls water away from the body keeping you warmer and drier.
-  **future flex:** body glove's performance stretch material. super soft, super flex, and velcro resistant.
-  **fox flex:** super stretch material, providing added performance, durability, and comfort.
-  **thermofiber:** heat reflective hollowfiber panels located on the interior of the suit. keeps you warm and feels great.
-  **ti-si:** a combination of scs titanium, finemesh, and stretch fabric. the scs titanium gives you 30% more warmth over standard neoprene.
-  **metalite:** heat retaining nylon. the nylon is laminated with titanium particles that retain heat given off by the body.

construction

-  **vaporlock:** triple glued blindstitched seams, sewn with a two-thread stitch that automatically ties itself off if the stitch is broken.
-  **flatlock:** the flatlock stitch prevents rash and is more comfortable than the conventional overlock.
-  **fluidseal:** liquid tape that stretches, designed specifically for today's advanced stretch materials. allows zero water penetration, while allowing flexibility.
-  **s-flex:** taping of seams. the s-flex construction makes for a better seal, providing warmth and durability.
-  **spot tape:** taping of seam intersections for added durability and seam strength.

ENGINEERED FROM HEAD TO TOE, INSIDE AND OUT. OUR WETSUITS ARE INCREDIBLY COMFORTABLE WHILE OFFERING THE MOST IN STRETCH WARMTH AND DURABILITY.
